To the case of the angle of the personal case of the angle of the players of the case of the case of the players of the pla

cards deck and 50 influence
points. Shuffle all decks. A turn starts
picking 5 cards from your deck (if empty, replace
it with your shuffled discard pile) and filling the
market to 5 cards with the 50 cards market deck. You
can play any, number of cards from your hand in front
of you and 1. CHARM: move one card from the market
to your discard pile if the sum of played CP is equal or
greater the card CC or 2. MUTE: move one card from
the opponent party to his discard pile and pick a new
card from your deck if the sum of played MP is equal
or greater the opponent card LP. All your played cards
are discarded after every action. The turn ends when
you play your last card from your hand: the remaining
played cards are your party. Reduce your influence
points by the sum of the opponent party LP and
if hits 0, you lose! Your opponent discards his party
and starts his turn. Keep playing until there's a winner.
